27 Medical researchers are developing a wireless blood pressure monitoring system for use in hospitals. This system allows nurses to measure a patient's blood pressure without awakening the patient. Which is the intended benefit of this technology?

- A** Patients will not be disturbed.
- B** Patients will have to take fewer medications.
- C** Patients can experience pain relief.
- D** Patients can avoid having surgery.

You must explain why your answer is correct.

Please write the page number in your book that supports your explanation.

WRITE DOWN YOUR HOMEWORK WHEN YOU FINISH!

Use the index of your book to help you.

Objective

- I can distinguish between the six simple machines.

Scavenger Hunt

- Today, we are going on a scavenger hunt.
- You will look for different simple machines all over the school.
- In hallways, you must stay SILENT. If I hear your voice, you will be given an alternative assignment to complete in another teacher's room.
- You must find three of each kind.

Exit Ticket

- Which one was most difficult to find?
- What kind of place would actually have this simple machine?
- Complete crossword puzzle.
