37 During respiration, what substances combine to release energy for the cell?

- A** glucose and oxygen
- B** oxygen and carbon dioxide
- C** glucose and water
- D** water and oxygen

You must explain why your answer is correct.

Please write the page number in your book that supports your explanation.

Use the index of your book to help you.

Rube Goldberg Wednesday

I can distinguish between the six
simple machines.

Objective and Agenda

I can distinguish between the six simple machines.

- Today, you will finish your machines.
- Make sure you have 5 different simple machines and at least 5 steps!
- If you finish, work on vocabulary cards!
 - Picture, word, definition
 - wave, vibration, transverse wave, compressional wave, trough, crest, wavelength, amplitude, frequency, electromagnetic wave
